Ensuring a blind review:

Please check if the following steps have been taken with regard to the text and the file properties:

1. The authors of the document have deleted their names from the text, with "Author" and year used in the references and footnotes, instead of the authors' name, article title, etc.
2. With Microsoft Office documents, author identification should also be removed from the properties for the file (see under File in Word), by clicking on the following, beginning with File on the main menu of the Microsoft application: File > Save As > Tools (or Options with a Mac) > Security > Remove personal information from file properties on save > Save.
3. With PDFs, the authors' names should also be removed from Document Properties found under File on Adobe Acrobat's main menu.

1. START 2. ENTER METADATA 3. UPLOAD SUBMISSION **4. UPLOAD SUPPLEMENTARY FILES** 5. CONFIRMATION

This optional step in the submission process allows authors to add files to the submission which improve the contribution which the submission makes. Supplementary Files might include (a) research instruments, (b) data sets, which comply with the terms of the study's research ethics review, (c) sources that otherwise would be unavailable to readers, or (d) figures or tables that cannot be integrated into the text itself. These files are also indexed by the author, identifying their relation to the submission, as well as their ownership. Supplementary Files can be uploaded in any file format and will be made available to readers in their original format. They can be shared with peer reviewers, if they do not compromise the blind review.
